

Lamp Harp Function

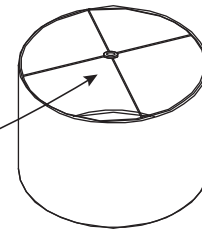

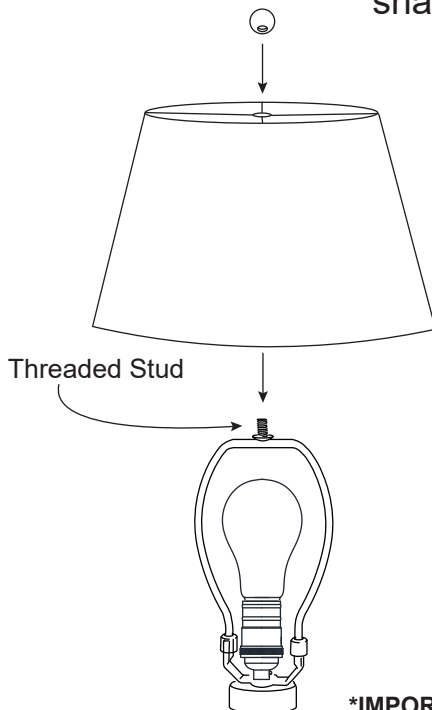

Installation: Slide Caps up, squeeze Harp together and fit into Saddle. Slide Caps down to lock Harp into place.

Removal: Slide Caps up, squeeze Harp together and lift Harp out of Saddle.

Shade Installation

Harp is designed to accept any shade with a standard "Spider Fitter" as illustrated here.

PROCESS:

1. Gently fit Shade over harp/bulb/socket.
2. Place center ring ("Spider Fitter") over threaded stud.
3. Secure Shade by threading and fully tightening any standard Lamp *Finial.

***IMPORTANT:** Some bulbs create intense heat. Do not use any Finial that could melt, burn or deform. Ballard Designs recommends an LED Bulb with a 2700-3000K Color Temperature.
