## WALL ANCHORING HARDWARE (ANTI-TIP)

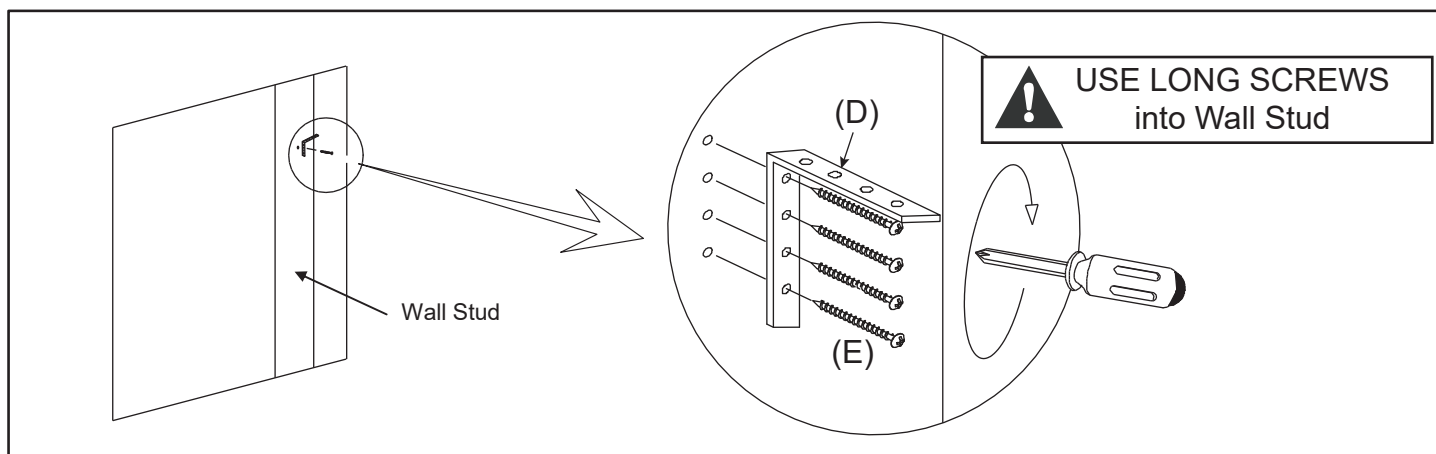

### Steps 1 through 3

**STEP 1:** Determine installation location, then identify two wall studs\* behind unit. Push unit into place then slide each L-Bracket (D) over top of unit and center in front of each wall stud\*. Use pencil to mark wall at top of each Bracket.

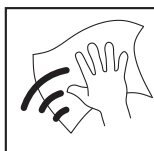

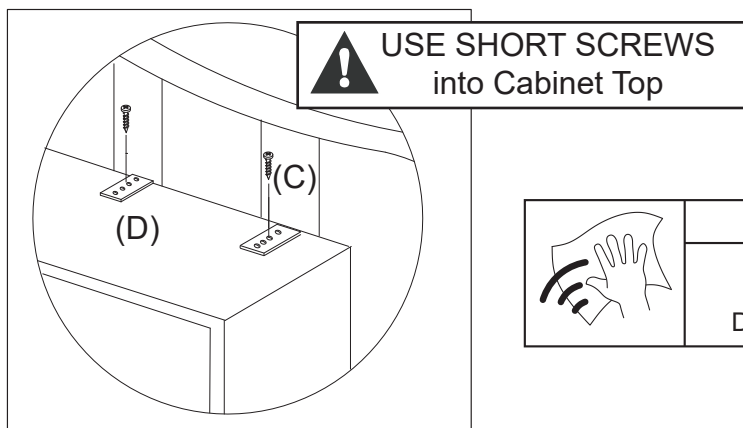

**IMPORTANT:** Orient Brackets as illustrated to ensure they are not visible after installation.

**STEP 2:** Pull unit away from wall, align L-Brackets (D) with marks on wall then anchor L-Bracket directly into wall stud using four Long Screws (E).

**STEP 3:** Move unit back into place and slide under both L-Brackets (D). Attach using Short Screws (C) and a Phillips Screwdriver to firmly tighten. **NOTE: Floor molding may prevent all holes from covering top, install Screws into those holes which cover top.**

#### Cleaning and Care

Periodically dust with a soft, dry cloth.  
Protect surfaces to prevent damage.  
Do not use alcohol based cleaners or polishers.
