

PRODUCT NAME: BEADBOARD DRYING RACK RAIL
ITEM NUMBER: MI442 RAL
DIMENSIONS OF ITEM ASSEMBLED: 46" X 2 3/8" X 42 1/4"H

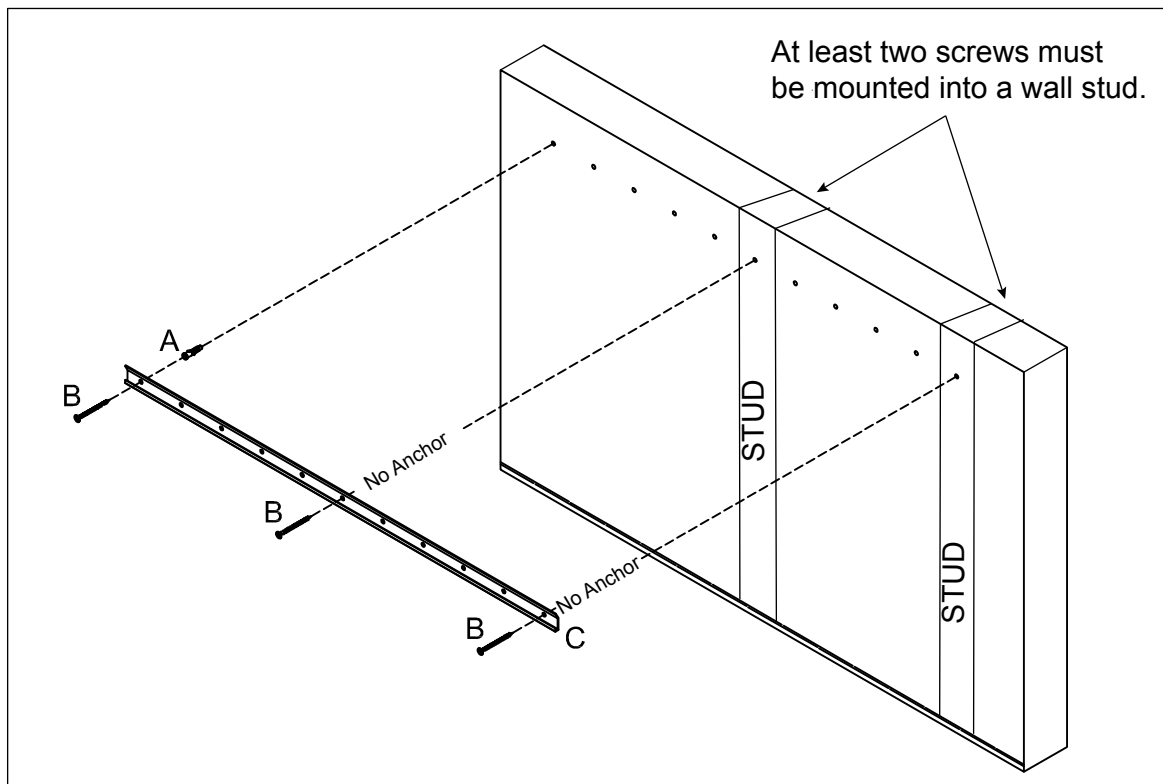

Ltr.	Qty.	Hardware Included
A	3	 Wall Anchor
B	3	 Tap Head Screw
C	1	 Mounting Cleat

REQUIRED TOOLS:
Phillips Screwdriver
Level
Drill

Ltr.	Qty.	Components
D	1	

STEP 1: Determine exact location of Drying Rack on wall. Using a level, place Mounting Cleat (C) in desired location and use a pencil to mark three holes. NOTE: At least two (preferably all) screws must be driven into a stud. Use a drill to create small holes in drywall and insert an Anchor (A) into the open drywall holes, but **NO hole or anchor over a stud**. STEP 2: Align holes in Mounting Cleat with Anchors and stud(s) and use Tap Head Screw (B) to secure cleat to wall. Firmly tighten.

Step 3: Gently lift and hang Drying Rack on Mounting Cleat (C) by hooks mounted on each end of the Drying Rack.
